Add to wishlist Install

This is an upgrade from the previous version of Masjid Timetable. It has a completely new look but this is not an Android Update. This has been built from the ground up.

Masjid Timetable does what many other apps don't do. It gives you your very own LOCAL masjid salah times.

Or from Apple iTunes

Masjid Timetable

Open iTunes to buy and download apps.

Description
Masjid Timetable is the pioneer in providing local masjid salah times. It doesn't give you an approximate time for your area. It actually gives you the times of salah in your very own local masjid.

What's New in Version 2.51
Bug fixes for alerts.

Screenshots

Download and install the app on to your mobile device.

Launch the app by selecting the following icon

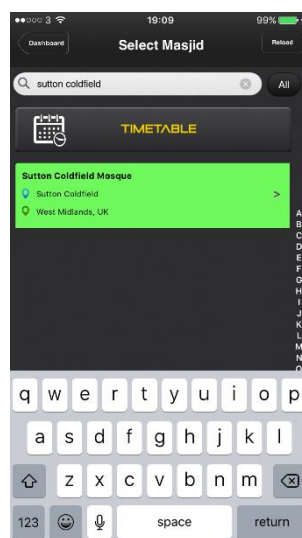

The Masjid Timetable interface is easy to use. There are three themes to choose from and a variety of menus options for your needs. You can even browse hot topics and articles at the learning centre, all within the app!

Dashboard: The Dashboard is the hub of the app and from here; you can navigate to other pages.

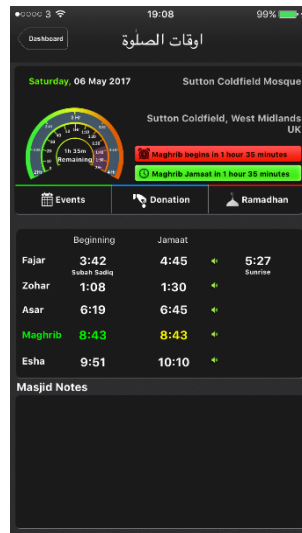

Select Masjid: You will be presented with a list of masjid's present in the apps database. To find the Sutton Coldfield Masjid enter the name in the search bar and select from the list. You will then be taken to the Masjid Details page.

Masjid details: Here, you will find information regarding the Sutton Coldfield Masjid and you can set it, as your favourite. You can also set up to three other masjids in your favourites list.

Timetable: This is the heart of the app and this is the page you will visit most often. This page lists the five daily prayer times of the masjid.

You may also see a list of the masjid's notes and important information here.

Settings: You can set notifications i.e. be notified xx minutes before jamaat time so you can do wudhu and prepare to leave for the masjid.

Set your desired time format display (12h / 24h)

Receive notification of events.
